

Decadal Clock

CMSI 402 Status Report
March 27th 2019

Accomplishments

- finished the UI for both the mobile clock app and the interface
- got all the tech needed for installations
- figured out that had to switch over app into mobile web apps for the show

This Weeks Plans

- working on connecting PHP/JS getting the remote to work
- setting up for installation this weekend and have it up by tuesday
- get a connection going and have the 70s decade done by the end of this week
- setting new goals for decades
- need to fix decade graphic design

Next Weeks plans

- figuring out websockets/node server
- working on PHP/JS Parsing to get the connection going

Risks or Help

- needing help with php connection
- might not be done in time for the installations
